

Vistex and gicom join competencies around Special Pricing and Condition Management as well as Data Maintenance

Vistex and gicom join forces to deliver more value to customers on complex pricing and condition management issues in Germany, Switzerland and Austria. The combination of Vistex' embedded add-on solutions and gicom's expert knowledge of business process design, procurement and pricing condition management will enhance the value of customers' investments in SAP solutions significantly.

About Vistex: Vistex is a global SAP Software Solution Partner that develops and delivers embedded add-on solutions in support of SAP applications that enable customers to automate and more effectively manage all aspects of contract pricing agreements, rebates, chargeback claims and performance-based incentives such as sales commissions, broker/agent fees, and royalties. Vistex applications augment "core" SAP software functionality and enhance the value of customers' investments in SAP solutions, providing low risk, low total cost of ownership, and rapid return on investment solutions for critical business functions and processes, including master data maintenance within SAP solutions.

About gicom: gicom provides solutions and leading expertise for procurement-, supplier- and master data-management. It offers Business Excellence in Supplier and Chargeback Management solutions, process integration and collaboration with SAP NetWeaver® BW/BI and Enterprise Portal® and Master Data Management solutions (incl. Workflow and Automation). The gicom group consists of gicom GmbH and gicom Management Consulting GmbH in Germany, gicom Procurement Services & Consulting in Switzerland and gicom LP in the US.
