

SAP Information Sheet

SAP S/4HANA | SAP S/4HANA for Rights and Royalty Management by Vistex

# Comprehensive, Unified Intellectual Property Rights and Royalties Management

THE BEST RUN

### Summary

The SAP S/4HANA® solution for rights and royalty management by Vistex centralizes rights and royalties control in a single solution for managing intellectual property, from initial rights acquisition or origination through acquisition to monetization. The solution enables organizations in music, media, and beyond to create and manage rights contracts, royalty agreements, and inbound and outbound financial obligations to optimize the value of intellectual property.

### Objectives

- Track intellectual property use and legal clearance
- Unify data and processes for all content contract types
- Manage complex licensing contracts and large transaction volumes
- Maintain rights for multiple properties on a single contract

### Solution

- Management of high-volume financial processes, including settlement payments
- Comprehensive, configurable solution based on SAP S/4HANA
- Modeling, forecasting, and what-if analysis
- Scalable solution that enables processes across countries and currencies

### Benefits

- Increase monetization of intellectual property assets through license and product sales
- Optimize the use of owned assets
- Increase operational efficiency
- Reduce total cost of ownership
- Minimize ongoing support costs by using the current infrastructure and knowledge base

## SAP Information Sheet

Intellectual property drives business success for enterprises in music, media, brand licensing, high tech, consumer products, gaming, and beyond. And managing content, partnerships, agreements, and rights is increasingly complex in the global digital economy. For example, traditional royalty calculation methods can no longer keep up with the volume of transactions to process, leading to lost licensing revenues and inaccurate reporting as errors increase.

The SAP S/4HANA® solution for rights and royalty management by Vistex provides comprehensive functionality for managing intellectual properties. From initial rights acquisition or origination, the solution lets you create and manage rights contracts, royalty agreements, and inbound and

## Quick Facts

outbound financial obligations. It automates processes, delivers real-time analysis for revealing insights, and enables intelligent intellectual property management.

With the solution, you can perform rights inventory management and availability analysis and process royalties for products and services derived from intellectual property. You can manage complex licensing contracts, accommodate large transaction volumes, and maintain rights for multiple properties on a single contract. Moreover, the solution lets you replace legacy solutions and reduce implementation time and effort while limiting ongoing support costs by leveraging your current infrastructure and knowledge base.
