

# Data Maintenance

Your data working for you

SOLUTIONS FOR SAP

## Keep pace as the speed of business accelerates

Empower business users and improve data entry performance with Vistex's data maintenance solution. As organizations seek to define and execute effective market strategies, they rely on a foundation of accurate master data and an efficient means of maintaining it. Vistex provides automation tools that define, enrich, validate, approve, and syndicate master data for customers, vendors and products. With increased accuracy, visibility and reliability to supplier, product and customer data, businesses are able to make better decisions around marketing and selling strategies.

### ■ Data Reliability

Reduce business risk by improving data entry accuracy and reliability of relevant master data

### ■ Simplified Maintenance

Improve productivity with an easy-to-use single screen interface that simplifies maintenance of material, customer, and vendor master data

### ■ All-in-One View

Reduce the intangible costs of master data inconsistencies and increase business performance

### ■ Up-to-date Audit Trail

Strengthen compliance with consistent, up-to-date information and a solid audit trail

# Take ownership of your data and make informed business decisions with **Data Maintenance**

## **Make Better-Informed Business Decisions**

Vistex solutions provide a powerful set of workbench tools that allow non-technical business users to maintain material, customer, and vendor master data within the core SAP ERP application – including customer and vendor records. With a centralized place for master data, key information is automatically distributed to the appropriate places in ERP.

## **All-In-One View**

Vistex's solution for data maintenance provides an all-in-one view into material, customer, and vendor data in core SAP ERP. Visibility is augmented by data profiling tools that generate wide-ranging reports to keep business users up-to-date, allowing them to maintain and validate data accuracy. In addition master data maintenance is automated across organizational levels including sales organizations, distribution channels, divisions and plant locations.

## **Better Product Data: Keep Pace with the Innovation Cycle**

Vistex's solution for data maintenance helps businesses meet the challenges around product innovation cycle times by performing appropriate checks, reviews, and audits before data is passed on to the material or article master. Maintaining unlimited product attributes helps businesses accommodate the data requirements of partners, industry, trade organizations as well as comply with government regulations. Through a single point of access, users can update all customer and vendor info records and manage future changes with effectivity dates.

## **Better Partner Data: Automate Customer and Vendor Relations**

Vistex's solution for data maintenance provides a complete, unified picture of all customers and vendors in core SAP ERP and addresses the challenge of maintaining accurate data for a growing list of customers and partners. Supporting unlimited user defined attributes, tabs and fields, the application allows business users to organize and display customer and vendor according to unique business needs – rather than be locked by the requirements of the data structure.

# Data Maintenance Adds Up to Real Solutions, Real Benefits

- Automate data validation through business rules and audit reports
- Set-up future changes with effectivity dates
- Automate approvals through workflows
- Define user-specific views to simplify and improve data entry accuracy
- Streamline end-to-end business processes and leverage rules for data validation and governance
- Add non-SAP user definable attributes in a workbench to maintain customer, vendor and materials data
- Step-by-step guided procedures to create rules-based agreements

## Deployment Options | Run it your way

Whether you decide to run your systems on-premise, in the cloud or in a hybrid environment, Vistex's innovative solution extensions for SAP empower your organization with unprecedented visibility into any program and performance. Gain deeper insight and enable fact-based decisions to drive revenue, control cost, minimize leakage, and streamline processes. With a range of deployment options for all your programs, you choose the way that works best for your business needs.

### Add the right option for your business
